## **MEMORANDUM**

**TO:** Hospital Administrators  
Hospital Pharmacists  
Infusion Sites  
Local Health Departments  
Primary Care Physicians  
Hospital Emergency Response Coordinators  
Regional Hospital Coordinating Centers

**FROM:** Theresa Tolar, BSN, MBA, RN  
Hospital Preparedness Coordinator  
Division of Preparedness and Readiness  
Office of Preparedness and Response

**RE:** Cycle 07 Antibody Therapy Allocations to Healthcare Partners

Cycle 07 Antibody therapy were allocated the week of 10/25 to 11/1/2021 as below. It includes three monoclonal antibody preparations for outpatient management of

- a) Covid -19 Regeneron's antibody cocktail casirivimab/imdevimab (IV or SubQ for treatment or post exposure prophylaxis)
- b) Bamlanivimab/etesivimab (IV only for treatment or post exposure prophylaxis)
- c) Sotrovimab (IV only for treatment).

In Cycle 07 the State of Illinois was allocated 1210 patient courses of bamlanivimab/etesivimab and 2016 patient courses of Regeneron's casirivimab/imdevimab and 810 patient courses of Sotrovimab.

### **State Allocation Process will consider the following metrics:**

- **Prior utilization per Teletracking and NHSN reports**
- Case rate by county
- Available ICU beds in COVID Region (not all counties have ICU beds)
- Social Vulnerability Index by county (High vs. Low SVI)

## Updates:

- Please consider using bamlanivimab/etesevimab IV in place of regencov IV for infusions in situations of shortage.
- IV Regeneron formulations may also be used for Subcutaneous dosing.

**Any vials not accepted by healthcare partners will be re-allocated to other healthcare providers based on urgent requests to IDPH.** *Note: A request does not guarantee the amount of Mab requested will be provided or that the request will be approved. Priority will be based on areas of the state with the greatest need.*
