

GET THE FACTS ABOUT THE FAIR TAX

Illinois' Current Tax System is Fundamentally Unfair

Under our current system, millionaires and billionaires pay the same tax rate as frontline workers like nurses and grocery store clerks. This places the burden on our middle and lower-income families, who are forced to pay nearly double the percent of their income in taxes than the wealthy.

Our Current Tax System Is Outdated

Illinois needs to update its tax system to the one employed by a majority of states and the federal government.

Under the Fair Tax, At Least 97% of Illinoisans Will See No Tax Increase

Under the Fair Tax, at least 97% of Illinoisans will see no state income tax increase, with only those making more than \$250,000 a year paying more.

Our State Currently Faces a Massive Budget Hole

We are in a massive budget crisis, and we need the Fair Tax to put our state on the path to fiscal sustainability.

The Fair Tax Would Bring Much-Needed Revenue into the State

The Fair Tax would bring in billions of dollars in much-needed revenue each year, which can then go toward addressing the budget crisis and funding critical programs, including our schools and lowering property taxes.

Our Small Businesses Need The Fair Tax

The Fair Tax will help create strong communities and a stable fiscal environment for our small businesses to thrive, while only raising taxes on businesses making more than \$250,000 a year in profit.

A "Yes" Vote On The Fair Tax Means:

Only those making more than \$250,000 a year will see their taxes increase, and many middle and lower-class families will see a tax cut.

A "No" Vote On The Fair Tax Means:

Legislators would be forced to consider raising taxes on all Illinoisans by at least 20%.
