RE: Week 3 Antibody Therapy Allocations to Hospitals

Week 3 Antibody therapy allocations includes the addition of Regeneron's antibody cocktail casirivimab/imdevimab for the treatment of mild to moderate coronavirus disease. In week 3 the state of Illinois was allocated 3,160 vials of Eli Lilly's bamlanivimab and 2,280 vials of Regeneron's casirivimab/imdevimab and distribution will begin the week of November 30, 2020.

The following methodology was used to calculate the allocations to hospitals for Week 3:

- The proportion of COVID med/surg and ICU hospitalizations for the week of November 18 – November 23, 2020.
- Consideration for Safety Net hospitals and critical access hospitals that serve high priority populations including aged, Latino, Black, and rural communities.

Any vials not accepted by hospitals will be re-allocated to other hospitals based on urgent requests to IDPH.
